JNTC Support Elements (SE)

- **Topic:** Continued senior leader support of the JNTC SE program is required.
- **Status:**
  - JNTC SE represent a cadre of personnel, provided by USJFCOM, that are permanently assigned to a COCOM staff, Service training program, or other Service activity for the purpose of efficiently implementing the JNTC and other T2 capabilities.
  - Currently, 32 of 37 JNTC SE personnel have been identified / deployed. An additional 17 JNTC SE personnel will be deployed by the end of FY 06.

- **Issue(s):** Request for continued support as the program enters subsequent phases of the deployment.

- **Impact:** Phase II will introduce JNTC COCOM training requirements analysts to perform future training requirement analysis and conceptual development of future training methods and systems. Phase II will also see us deploy SEs to include all accredited (nominated) Service Training Programs and expand our collaborative knowledge and requirements sharing process for all personnel conducting T2 functions.

- **Actions to Resolve Issue (Current / Planned):**
  - Continue to update senior leadership through the JIPT, SAG, and ESG forums.
  - Continue to solicit support and involvement for the JNTC SE program.

SE Fielding Concept

- SE fielding will be accomplished in phases
- Phase I was FY 05 fielding
  - 5 per Service and SOCOM
  - 2 per geographic combatant command
  - 1 per functional combatant command
- Phase II will commence in FY 06
  - Commitment to having at least one SE per currently accredited (or nominated) Service training program
  - 1 additional SE to COCOMs for future training design development.
- Phase III will be based on results of accreditation

Phase I Highlights

- Team is gelling as an effective instrument for Training Transformation
  - Assisting programs with Accreditation and Certification
  - Identifying JNTC architecture requirements
  - Aiding in getting programs on the JTEN
  - Aiding programs with planning and executing joint training
  - Involved with ITE
  - Being received well
    - SE have been “a great addition” SOCOM representative at the September JIPT
- Continuing to actively recruit for remaining positions
  - Working with local commands to identify candidates
  - Using internal and external recruiting sources
    - Company websites
    - Ads in the local papers
    - Service transition websites

Service SE Concept

- Phase I Concept
  - Accreditation, certification and joint training needs identification and analysis
  - Assist in development and evaluation of joint and interoperable training objectives
  - Training program planning, execution, and analysis support
  - JNTC investment planning and implementation coordination
  - Technical integration and technical and logistics support

- Phase II Concept
  - All FY 05 functions
  - Expand efforts to ensure there is at least one SE assigned to every accredited (nominated) Service Training Program
  - Introduce “R&D Laboratory LNOs” to better integrate Service architectures with JNTC architectures.
  - Provide collaborative knowledge and requirements sharing process for all personnel conducting T2 functions

Combatant Command SE Concept

- Phase I Concept
  - Accreditation, certification and joint training needs identification and analysis
  - Assist in development and evaluation of joint and interoperable training objectives
  - Training program planning, execution, and analysis support
  - JNTC investment planning and implementation coordination
  - Technical integration and technical and logistics support

- Phase II Concept
  - All FY 05 functions
  - Introduce JNTC COCOM training requirements analysts & training designers to perform future training requirement analysis and conceptual development of future training methods and systems
  - Provide collaborative knowledge and requirements sharing process for all personnel conducting T2 functions

JNTC COCOM SE coordination w/JTSS

- JTSS – Work immediate COCOM training requirements
  - Support implementation of JTS
  - Coordinate JMETL development
  - Draft Joint Training Plan (JTP)
  - Support JTIMS use

- SE personnel perform future training requirement analysis and conceptual development of future training methods & systems
  - Analyze emerging COCOM missions / warfighting capabilities requirements and translate them into JNTC plans
  - Work with COCOM and JMO to determine how to meet those requirements (i.e. expanded JTEN, new M&S capability, etc,.)
  - Help determine implications for JNTC as a whole
